ESP-333[™]

Vegetative Microbial Liquid Microbial Block

Hydrologix Systems utilizes only naturally occurring (not genetically altered) highly selectively adapted microbial cultures for aseptic fermentation. Specific organisms are isolated for their unique synergistic growth characteristics for optimal organic degradation/ chelation.

Why ESP-333[™]

E= Energizing catalyst, biologically produced

S= Substrate - soil, nutrients, fertilizers, etc

P= Product - increased plant health, productivity

The better the catalyst. The greater the reaction potential.

Hydrologix Systems microbial concentrates provide an excellent combination of viable organisms, nutrient broth, macro and micro trace elements for superior field growth performance.

Specification: Bacillus Subtilillus - 2 with substrains

Bacillus Licheniformis

Bacillus Megaterium

Pseudomonas Fluorescens

Proprietary Azotobacter

Bio-extracts

Proteinates

Cu, Zn, Bo, Mo, Mn, Mg, N, P, K, S, Ca, Fe, Co, etc., in a balanced blend for rapid assimilation.

The ESP-333[™] biological solutions and nutrient blends are carefully crafted to promote a healthy rhizosphere to increase plant health and productivity.
