## Marriott Resort Magically Turns Brown Grease "Green" With The Cost-Cutting Hydrologix GRS

### OPTIONS

*Waikoloa Beach Marriott Resort and Spa in Waikoloa, Hawaii, has just installed the trailblazing new Hydrologix Grease Reduction System, the Hydrologix GRS, which transforms their restaurants' brown grease waste into clear water - right in the grease trap! Their choice of both a cost-cutting and "green" service is a business smart decision in these tough economic times since the innovative GRS drastically reduces the need to pump and haul away the grease trap waste. A fantastic savings not just in dollars, the GRS also provides a truly "green" way to recycle at the source, so protecting our communities and ecosystems, a win-win solution!*

Waikoloa, Hawaii ([PRWEB](#)) May 21, 2009 -- Hydrologix Grease Reduction Systems, Inc., announces their revolutionary new Hydrologix Grease Reduction System, [the Hydrologix GRS](#), is now being used by the Waikoloa Beach Marriott Resort and Spa in Waikoloa, Hawaii, to turn their restaurants' brown grease waste into clear water - on the spot, in the grease trap! Given the current weak economy, choosing both a cost effective and "green" service is a savvy decision for the management of this Marriott Hotels resort and demonstrates their commitment to sustainable environmental practices.

and other food service operations," says Cindy Furtado, Vice President of Sales for Hydrologix Grease Reduction Systems, Inc. "It's the wave of the future! Our GRS is the most 'green' solution commercially available and very affordable. With no more pumping and dumping, we are also making great strides to protect our communities and ecosystems. Everyone benefits."

Hotel [restaurant grease interceptors and grease traps](#) are county or city mandated receptacles to contain the food waste liquids from kitchen drains, in particular problematic F.O.G. (fats, oils, grease). Although covered and periodically vacuum pumped by grease hauling companies, occasionally foul odors disturb staff and customers and unexpected overflows may occur. Local authorities across the USA charge hefty fines for overflows, since this grease trap wastewater if untreated, contains potentially harmful anaerobic organisms such as salmonella, as well as methane and hydrogen sulfide gases. The Hydrologix GRS's innovative aerobic treatment system hosts a proprietary blend of food grade microorganisms that multiply rapidly to continuously digest all potentially harmful matter. The result? These critters 'magically' transform the liquid waste into clear water!

Grease Trap Before and After Hydrologix GRS Treatment

Hydrologix GRS customers especially value the odor control and the peace of mind knowing that a grease trap's wastewater levels are monitored around the clock. "We are pleased to have found the Hydrologix GRS service as it makes good green business sense. This fits well with the Marriott Hotels continued efforts to be environmentally responsible," explains Mark Baybayon, Director of Engineering for the Waikoloa Beach Marriott Resort & Spa. Other well-known resorts also using this service are the Montage Laguna Beach and Rancho Bernardo Inn Golf Resort and Spa, in California.

Hydrologix Grease Reduction Systems, Inc., based in Hawaii and California, provides the Hydrologix GRS service in the USA through regional providers. After six years of development and with five patents filed, their Hydrologix GRS is available commercially as a [grease trap F.O.G. wastewater treatment](#) solution for the Food Service and Hospitality Industry. The licensor company Hydrologix Systems, LLC, has a proven track record of more than 20 years in the design, engineering and deployment of innovative solutions in soil decontamination, water and wastewater treatment. Visit their Web site at [www.hydrologix.org](#) and [www.greasereduction.com](#). The Hydrologix logo and name are registered trademarks of Hydrologix Systems LLC.
